JALENSO HOLDINGS

POWER AND INDUSTRIAL INFRASTRUCTURE

Company Profile 2026

Heavy electrical works above 33 kV, supported by civil, mechanical and protective infrastructure services.

Southern Africa

Experience and company credentials

Jalenso Holdings combines established client relationships with leaders who bring more than 20 years of industry experience across power, mining, industrial plants and public infrastructure.

EVANDER GOLD MINES ESKOM SASOL AIR LIQUIDE SERITI ELIKHULU

308 PROJECTS COMPLETED / B-BBEE LEVEL 1 / HV ABOVE 33 kV

South African industrial delivery capacity supported by a permanent workforce, specialist project hires and approved technical partners.

Four equal service divisions

01	**Heavy Electrical Works**	HV above 33 kV, substations, lines, transformers, protection, cables, MCCs and commissioning
02	**Civil Infrastructure**	Foundations, earthworks, drainage, industrial buildings, roads and reinforced concrete
03	**Structural and Mechanical**	Steelwork, tanks, piping, conveyors, plant installation and shutdown support
04	**Corrosion and Rubber Lining**	Surface preparation, industrial coatings, tank lining and slurry-duty protection

SERVICE 01

Heavy Electrical Works

Jalenso leads with heavy electrical delivery for mines, plants, utilities and major infrastructure programmes.

- Substations and switchgear above 33 kV
- Power transformers, protection and control
- MV and HV cable installation
- Overhead power lines
- MCCs and industrial distribution
- Testing and commissioning

SERVICE 02

Civil Infrastructure

Civil work is planned around live industrial conditions, programme interfaces and the installation requirements of electrical and mechanical systems.

- Equipment and transformer foundations
- Earthworks and stormwater systems
- Industrial roads and hardstands
- Reinforced concrete structures
- Utility trenches and service corridors
- Buildings and plant support civils

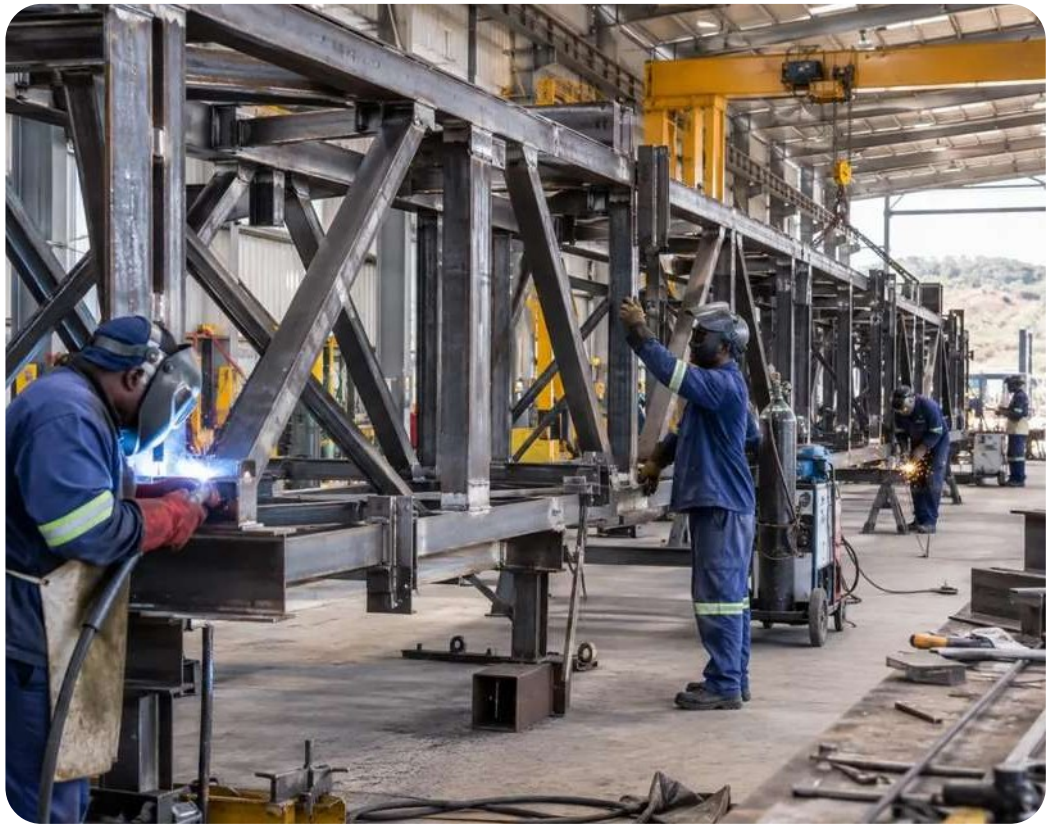

SERVICE 03

Structural and Mechanical

Fabrication and site installation teams support upgrades, plant expansions and shutdown programmes across demanding operating environments.

- Structural steel fabrication and erection
- Process piping and pipe supports
- Conveyors and materials handling
- Tanks, chutes and hoppers
- Mechanical installation
- Shutdown and maintenance support

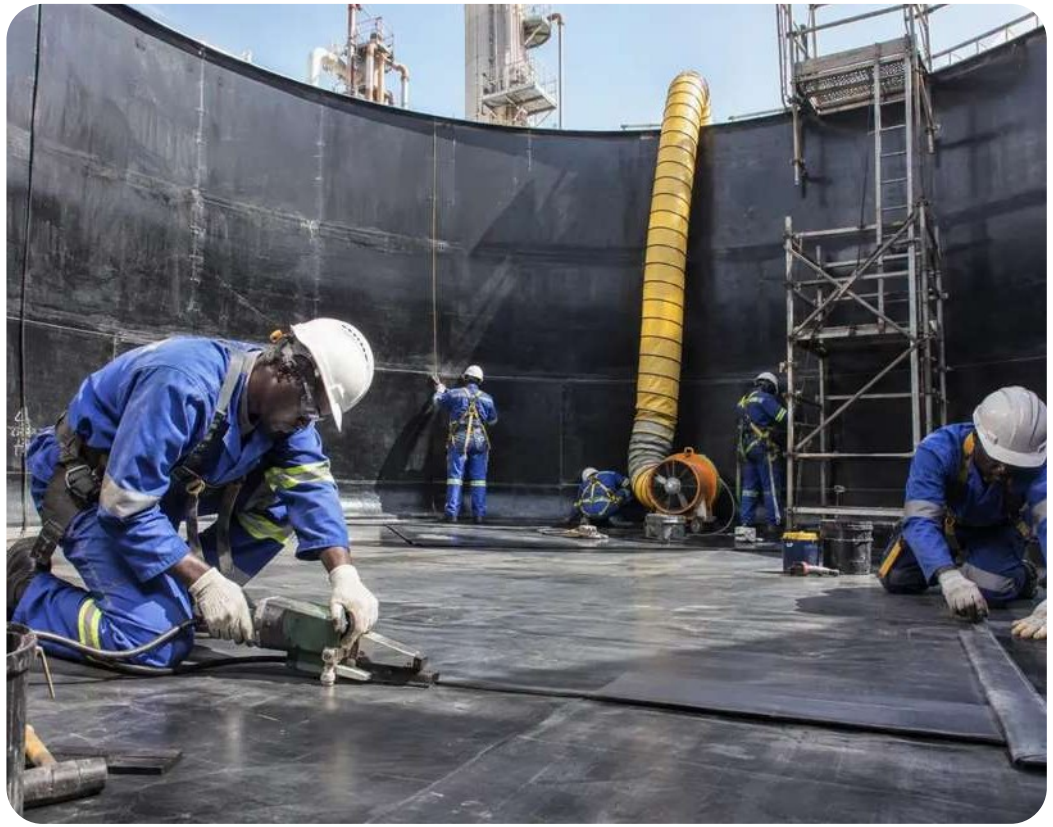

SERVICE 04

Corrosion and Rubber Lining

Protective systems extend asset life in abrasive, chemical and high-corrosion environments.

- Abrasive blasting and surface preparation
- Industrial coating systems
- Rubber lining for tanks and vessels
- Slurry pipe and equipment lining
- Inspection and quality records
- Planned maintenance programmes

Flexible delivery, one accountable lead

01

Permanent workforce

Core supervision, planning and trade capability maintained in-house.

02

Specialist project hires

Additional technical capacity mobilised to match scope and programme.

03

Approved partners

Specialist OEM, engineering and testing support integrated into one plan.

04

Full EPC management

Engineering, procurement, construction and commissioning managed end to end.

The delivery model scales without losing control of safety, quality, programme interfaces or final handover.

Industry experience that strengthens delivery

20+

years of industry experience held by our leaders

Project teams combine practical field knowledge with disciplined planning, documented quality control and accountable supervision.

Markets served

- Mining and mineral processing
- Power and utilities
- Petrochemical and process plants
- Industrial manufacturing
- Water and public infrastructure

Electrical project experience

Slurry Equipment Lining

Ready for demanding project environments

Jalenso's client portfolio spans mining, power, petrochemical, industrial gases and public infrastructure. Detailed project sheets and references can be provided for tender and prequalification reviews.
